

“Doctors, Lawyers, Teachers Discuss Health Crisis Management”

Translated speeches given by participants of the press conference held on 02.02.2022 at the Journalists House, Nicosia

Savvas Christofi - Coordinator:

Greetings to everyone who is watching. We thank all the journalists who came today to cover the different points of view of expert people - scientists, doctors, lawyers and educators will speak openly about the much-discussed topic of COVID-19 and the truth about it.

The time has come for a new chapter, THE CHAPTER OF CHANGE, PEACE, JUSTICE, SOLIDARITY, UNITY, RENAISSANCE, DEMOCRACY AND NATION.

The Cypriot people demand Democracy and Freedom now in order to put an end to all illegalities that we've been seeing the past 2 years.

We are putting an end to the Health Dictatorship which has an impact on the whole spectrum of society, especially on children and vulnerable groups, as well as family businesses and, of course, on the psychology and health of our fellow citizens.

It is clearly a matter of Freedom at all levels and we are now acting together and asking for the support of the Cypriot people. We go to our experts, whom we thank for being willing to take a public position with their substantiated opinion.

We move on to our first guest, an excellent doctor who has shown a lot of interest and patience in the matter, Doctor Anthousa Nikolaidou.

Dr. Anthousa Nikolaidou - Doctor:

Good day to you all. First of all, I would like to thank you for your presence at the conference and I hope that you will be given the opportunity to convey to the general public our positions on the issue of the coronavirus.

It is well known that for the last 2 years or more we have been in the difficult situation of a health crisis that does not seem to end and which was largely based on 3 lies - the so-called asymptomatic, the validity of the tests and the over-projected virus mortality. It's abundantly clear that the control measures to deal with this crisis have only brought about social and family division, the economic misery of many of our fellow human beings, the psychological catastrophe and the terrifying intimidation of all and especially of children. Upon hearing the "coronavirus positive" sentence, most of our fellow human beings panic, begin to fear death, and enter a vicious cycle from which it is very difficult to get out, especially without the real and humane support of a trustworthy doctor.

Unfortunately, we hear daily cases of non-existent primary medical care and this makes us very sad. People are afraid of getting sick and they are afraid of going to the hospital. Admission to a hospital with a diagnosis of Covid is accompanied by fear and panic of death. This whole scene in big degree is a result

of the tactics of the media and government policy that broadcast horror bulletins on a daily basis and not news bulletins. The violation of human dignity and free will is also very obvious. Modern bioethics speaks of choice, and yet we live every day in the nightmare of immoral coercion to vaccinate, and let the government and its advisory committee declare that vaccination is not mandatory.

We now live in a state of dictatorial health policy that has never occurred in the history of mankind. A healthy person is forced to undergo diagnostic tests of dubious validity to prove that he is healthy, which, even with the admission of the manufacturer, contain residues of toxic and carcinogenic substances. In addition, the population is bribed to be vaccinated, something that has never been done before, threatened with loss of basic rights, he is deprived of information and his free choice while at the same time his own consent to perform medical operations on his body is ignored. We also hear cases of people losing their jobs if they are not vaccinated, and many are forced to be vaccinated at the risk of their health with an experimental vaccine. This is not medical science, it is a dictatorship under the pretext of health. All this time we are spectators in a theater of the absurd, with measures that do not work and yet continue to be implemented. Much more, at the same time that in many other countries the measures are slowly being withdrawn, in our country they are becoming even stricter.

Our ancestors used to say "twice a sin is not a wise man", and yet those in charge continue to impose the mask and the repeated, and now daily, examinations on healthy people, to isolate asymptomatic people, to force vaccinations, and yet so-called "cases" increase. Everyone knows that we do not have so many real "cases", since the majority of them are positive for the examination of people without disease and without symptoms, but who are recorded and published as patients.

From personal experience and the experience of several other colleagues who could not be here with us, but also internationally, I assure you that there are therapeutic approaches that have helped thousands of patients at home, taking anti-inflammatories, with increased doses of vitamin D3 which has an important role in the treatment of coronavirus infection, accompanied by elevated doses of vitamin C which acts as an antioxidant and strengthens the body's defenses, as well as with the administration of supplements such as probiotics, zinc and others. Depending on the progression of the disease, patients can take inhaled, antibiotic treatment, anticoagulants as well as steroids, on medical indications.

◦ Of the patients receiving immediate and timely treatment, few cases require hospitalization and even fewer have ended up. What has played the most important role in the outcome of the disease is the strengthened immune system and prevention. In no case does the panic and fear of death that is cultivated by contractors help.

From the time of Hippocrates until today, medicine was based on natural immunity which has been proven to be superior to artificial immunity to vaccines. In this political management of the pandemic the concept of natural immunity has been abolished, as a result of which we see the reduction of the disease certificate from six months to three months, while in other countries that respect scientific knowledge the disease certificate lasts for nine months or more, and is renewed every three months with any confirmation of satisfactory antibodies. Unfortunately, the contempt for natural immunity in our country serves as another lever of pressure for forced vaccination.

But it is now well known that vaccines do not protect against infection or disease. In contrast, vaccinated people become ill and transmit and / or die, not only from COVID-19 but also from serious complications of vaccines (data available online).

Also, a very large number of vaccinated people suffer from serious irreversible complications that have been recorded worldwide, but due to lack of transparency they are not heard in the media, but instead are kept as a seven-sealed secret. In an animal experiment, if deaths occurred in 25-30 animals, the experiment would be stopped immediately. But the post-vaccination experiment for COVID-19 is unfortunately continuing.

It is time to present the scientific truth and to return to the fruitful and constructive dialogue based on scientific data and to respect the freedom of each of our fellow human beings as befits a democracy. We call on everyone to enter into a dialogue and the media to restore their social responsibility by promoting all views and encouraging the exchange of knowledge and experiences. The one-sided imposition of a monolithic approach to solving problems in society has never helped humanity.

Thank you.

Savvas: Thank you Doctor, next we have Dr Andri Polydorou, doctor and lawyer. As she is abroad in Athens, we will hear her news via video call:

Dr. Andri Polydorou - Doctor & Lawyer (video presentation):

I will speak as an ordinary citizen of the Republic of Cyprus, like all people, about how we experienced these two years of dictatorial decrees and to demand immediate accountability to the Government.

First, for the division it brought about.

Second, for targeting and punishing us because we are healthy. It is the duty of the state to protect this good, and not to separate us as if we were the lepers who will transmit the disease.

Third, for the controlled information that refers to dictatorial regimes, in order to sow fear and give privileges, forgetting that in the Republic there are no privileged classes.

Fourth, the state spent astronomical sums on the mismanagement of the pandemic, instead of creating infrastructure that could care for patients and remain available to health for decades to come.

Fifth, the state is not interested in the 700 deaths from smoking each year and the tens of thousands of euros spent on their treatment, and does everything for the 350 deaths a year from coronavirus.

Sixth, the state has deprived us of our human rights, sensitive personal data and medical confidentiality, and is forcing us to show them to everyone.

The opposition should assume its responsibilities for the two years that it has been silent and for the first time, perhaps for the last time, all the parties have sided with the government.

Even the National Bioethics Committee of Cyprus has to justify the attitude of a dead bed bug.

We ask for the resignation of the Archbishop because in no case does he represent the God we believe in, of love, of charity, of humility.

We accuse the media of forgetting what journalism would say and holding a monophony, enslaving themselves to the regime.

We demand that all those who sowed discord and shook the foundations of the family be held accountable, because while they knew that the vaccine was in a research stage, insufficient, and had side effects, they hid it. We also accuse them of never making public the deaths and hospitalizations in the intensive care unit due to its side effects. We accuse them that even now that countries have begun to reject the vaccine on children as more dangerous than the virus, they insist on their program.

We demand that everyone be accountable to the people and leave the high positions they are trying to integrate with.

Thank you very much.

Savvas: Thank you doctor. Next we have teacher Alexios Savvides, who for 2 years has taken this stance:

Alexios Savvides - Teacher:

- The management of Covid-19, by the executive and other powers, has caused destabilization at all levels. In schools of all levels, there is a climate of uncertainty, suspicion and insecurity due to the fear that is systematically cultivated but also due to the arbitrary measures that are constantly escalating.
- First, the measures violate basic human rights of teachers and students and promote discrimination and bullying,

Second, they lack scientific documentation and therefore circumvent any educational process. The beginning of every learning process is the human communication of all those involved in it, which is abolished by the continuous extension and escalation of measures. Distances, masks, continuous testing, safe pass, scanning, conversion of teachers into police officers, nurses, doctors and "specialists", bombardment with conflicting announcements for Covid-19, serious shortages in teaching staff, lack of interest from substitutes due to working conditions, conduct by the Ministry of Education, in this paranoia, four-month exams, abolition of holidays, in-school activities and educational trips , complete exclusion of the parent from the educational space, incomplete and insufficient information of the parents about the progress of their child, assuming the role of teacher by the parent with wrong anti-pedagogical approaches.

All of the above have led to a rupture and imbalance in communication between teachers, students and guardians. They do not reach the above, comes the "test to stay", another arbitrary and provocative measure that lacks scientific documentation, conveys ambiguous messages and confuses children. It violates the personal space of children and has an impact on both their physical and mental health as they undergo a frequent, psychologically damaging and morally questionable process. And all this while the file of the case, for the existence of ethylene oxide in a specific batch of rods (swabs) for rapid test, has been handed over by the police investigators to the Attorney General and the conclusion is awaited.

The bitter truth is that we have children full of guilt, fears, addictions, given up on any essential pedagogical perspective. Schools have therefore been transformed from places of joy, learning, creation, effective, constructive collaboration and communication into examination centers and clinical laboratories. Since it is internationally accepted that the Omicron mutation is milder with significantly reduced hospitalizations, the deescalation of measures should have already taken place in schools.

These ineffective measures as well as the failure to create the coveted wall of immunity but also the missteps and false news that expose our country internationally (such as the ridiculous and non-existent, as it became clear in a few days, Cypriot scientist's post about the non-existent Deltacron) have shaken public confidence in the advisory committee, in the "experts", in the relevant ministries, while sowing panic in society and undermining the moral, mental and spiritual health of children.

Savvas: Thank you Mr. Savvides, next we have Dr. Michalis Spyrou, who will share his thoughts and findings via video call:

Dr. Michalis Spyrou - Doctor (video presentation):

Greetings. Thank you for giving me the opportunity to express my views on two issues related to the current health crisis that afflicts the whole world, and of course our Cyprus could not be absent.

The first issue I want to address is vaccines in children. As a Doctor, I believe that vaccinating children, especially children aged 5 to 12, is not justified as it is known that even if they are infected with the coronavirus, the vast majority will not get sick, and will not show health problems while they pass the disease very easily. In addition, the benefit in relation to the potential risks from vaccine side effects does not support vaccination. After all, vaccines are still in the experimental stage, and we do not know what the consequences may be both in the near future and in the long run, and much more that side effects of vaccines in children such as myocarditis, pericarditis and other problems have already occurred.

For all the above reasons, vaccinations in children should be stopped and this should be understood by the Ministry of Health, the epidemiological team and the scientific world, but also by ordinary citizens. As new reports on complications and benefit and risk assessments from many countries are constantly being published, we expect the Pancyprian Medical Association to re-evaluate its position specifically on vaccinations in children.

The second issue I would like to address is the issue of mandatory mask use. Many studies have already been published that do not evaluate the use of the mask as important in terms of protection against infection. I have personally evaluated the data from my own practice with a number of 178 people who have visited me in the practice. For the routine clinical examination I perform in my office, I recorded the heart rate and blood oxygen while patients wore the mask. Then I asked them to remove the mask and after a few minutes I repeated the same measurements.

Personally, I have found that with any mask and when the person has the mask, the oxygen decreases by 2-3% and the heart rate increases. By this you understand that the heart is forced to work harder to adapt. That is, under-oxygenation is observed in the blood and since oxygen is the main factor in the functioning of the human body in combustion and metabolism, it is next to create normal consequences.

Consider forcing children to wear the mask in the classroom and throughout school hours. This is expected to negatively affect the brain function of children who are developing and need oxygen. In my personal opinion, the obligation to use a mask on children both in the classroom and much more outside the classroom should end.

Thank you.

Savvas: Thank you Dr Spyrou. Next we have Savvas Savvides who specializes as a human rights lawyer:

Savvas Savvides - Lawyer:

Thank you Savva and everyone else here today. I will be sharing my own professional and personal view on the developments of the past two years. The announcement two years ago of the beginning of an epidemic crisis (which some call a pandemic) came to test the quality of our Republic, the operation of institutions, the credibility of public bodies but above all the three powers of the Cypriot state.

◦ A cloudy situation accompanies the epidemic crisis, where it has finally overshadowed it. The current situation can be summarized as follows

1. Introduction of measures to separate citizens into different categories - mainly the unvaccinated and non-vaccinated, which is illegal, irrational and unjust
2. Creation of obvious discrimination against Greek Cypriot citizens of Cyprus where only they are checked for various certificates (electronic and not), while tourists and t / c are excluded
3. The two-year rule by decrees which remain unchecked and without any filtering or intervention by the parliament or accountability to it
4. The mandatory financial burden of citizens to pay for diagnostic tests at the same time as the test is mandatory and in most cases a condition for work, food and other basic needs,
5. Unprecedented pressure on citizens by all means to perform the medical act of vaccination - something unthinkable and prohibited by the Constitution and the Oviedo Convention - in fact the ratifying law of this convention, provides that the imposition of a medical act is criminal offense,
6. The introduction of electronic monitoring of citizens through the application of CovScan (or other methods) for the alleged control of relevant certificates and which is also illegal and unjustified, also in conflict with the Laws and European regulations on the protection of personal / sensitive data
7. The complete lack of trust in the personal responsibility and conscience of the citizens by all the authorities

8. The attempt to establish, through many ways, a single view of things as the only correct one with the cloak of "scientific knowledge" and at the same time to silence the different point of view about what is happening, which is a dangerous slip which refers to what took place in periods of authoritarian / totalitarian regimes

In view of the above, I consider it right and just for the citizens to demand and claim the obvious -

1. Abolition of all orders - decrees both through legal channels but also in their daily life and work
2. Gathering of all those who oppose / resist the slipping of society into exclusion, segregation and targeting of our specific fellow citizens such as the unvaccinated or those who do not wish to proceed with further doses of vaccines that are constantly promoted and in many ways.
3. The legislature - parliament must be pressed so as to stand in the way of this slippage. This must and can be done in many ways such as e.g. the enactment of a law or the amendment of the existing one on Dehydration, in order to control in advance -that is to approve / reject / amend- everything that the executive power intends to implement
4. In continuation of the above, all public bodies and especially the legislature must be pressured and convinced that they can not be given uncontrollable powers either to the Minister of Health or to any other minister to decide on almost all matters of the daily life of the citizens without any control or accountability.
5. The judiciary must monitor developments and listen to the society that expects the courts to be the refuge of every citizen and not the apologist of any other power in case of mistakes or omissions

Finally, we are all called to understand that if the non-genuine or current situation is consolidated, then an impersonal and completely foreign society will be presented to us, which will be a danger to all of us and our children. We must stand up to the circumstances.

Thank you very much.

Savvas: Next we have Mr Christos Neophytou, Lawyer:

Christos Neophytou - Lawyer:

1. The indications, the data and the numbers clearly show that we should all worry about where we are going. We have gathered a group of people of Doctors and Lawyers and we ask institutions to be accountable for where we are going. We ask the President of the Republic to respond to our letters asking him to intervene institutionally as the Supreme Leader of the State in order to stop the latent culture that wants to make critical decisions for the whole of our society behind closed doors and without proper consultation.

Letters to the President of the Republic with dates:

- 1.1. Letter dated 26/07/2021
- 1.2. Letter dated 28/07/2021
- 1.3. Letter dated 06/08/2021

1.4. Letter dated 11/08/2021

2. We call for an end to the imposition of various arbitrary views and narratives by non-experts, completely unsubstantiated, without the possibility of dialogue and controversy by reputable scientists and experts in the field of Epidemiology.

3. We ask the Speaker of Parliament but also the Members of Parliament to whom we sent letters on 16/09/2021, which were sent by Private Donors to answer the burning issues we raised, which include the Law on Children, the conduct of audits regarding the appointments of the members of the Advisory Group and possible conflict of interest, the control of the Importing Companies of Tests, etc. emphasizing in our letter that not answering them is tantamount to accepting our positions.

4. We ask the Minister of Health to give us answers to many issues related to the increase of hospital beds in hospitals, the maintenance of a register and file of side effects and deaths from these experimental vaccines, for masks for children, in the selection criteria of members of the advisory group, and many other questions to answer.

Letters to the Minister of Health with dates:

- 4.1. Letter dated 20/04/2021
- 4.2. Letter dated 14/05/2021
- 4.3. Letter dated 09/06/2021
- 4.4. Letter dated 05/08/2021
- 4.5. Letter dated 27/08/2021
- 4.6. Letter dated 29/11/2021
- 4.7. Letter dated 30/11/2021
- 4.8. Letter dated 01/12/2021
- 4.9. Letter dated 03/12/2021
- 4.10 .Letter dated 06/12/2021
- 4.11. Letter dated 07/12/2021

5. We ask the Minister of Education to answer us regarding the social marginalization of students who have already dropped out of school as well as to answer us about issues of online education.

Letters to the Minister of Education with dates:

- 5.1. Letter dated 16/03/2021
- 5.2. Letter dated 18/03/2021
- 5.3. Letter dated 19/03/2021
- 5.4. Letter dated 23/03/2021
- 5.5. Letter dated 29/03/2021
- 5.6. Letter dated 30/03/2021
- 5.7. Letter dated 08/04/2021
- 5.8. Letter dated 14/04/2021
- 5.9. Letter dated 20/04/2021
- 5.10 .Letter dated 21/04/2021

- 5.12. Letter dated 10/05/2021
- 5.13. Letter dated 14/05/2021
- 5.14. Letter dated 15/06/2021
- 5.15. Letter dated 30/06/2021
- 5.16. Letter dated 13/07/2021
- 5.17. Letter dated 02/09/2021
- 5.18. Letter dated 03/09/2021
- 5.19. Letter dated 15/09/2021
- 5.20. Letter dated 24/09/2021
- 5.21. Letter dated 13/01/2022
- 5.22. Letter dated 17/01/2022
- 5.23. Letter dated 21/01/2022

6. We ask the Commissioner of Population Control of the Republic of Cyprus, who is also the Registrar of Microbiological laboratories, to tell us which companies introduce the tests with the swabs that contain the highly toxic substance ethylene oxide and why it allowed the introduction and exposure to this highly toxic and carcinogenic substance.

7. We ask the Audit Committee of the Parliament to examine the criteria by which the members of the Expert Group were appointed while other specialists, namely Epidemiologists, were excluded, while at the same time we request an immediate investigation into who each expert is and whether he has financial or other conflicts of interest. We also ask for a check regarding the use of the mask in children 5 - 11 years old.

8. We ask the Statistical Service to give us complete data based on legislation 184 (I) / 2017 regarding the number of deaths in the year of vaccinations, i.e. 2021, compared to the last decade, i.e. 2010 - 2020, whether these deaths increased, by how much and for what reasons and complete evidence of side effects from these experimental vaccines. We also ask the Statistical Service to clarify with statistics what delays are observed in the management of critical and / or chronic diseases due to the health crisis.

9. We ask the Commissioner for Personal Data Protection and the Commissioner for Information to conduct research on the code used to collect and process data on tests, who created it, where this data is transmitted and used. We also ask for explanations on the basis of which criteria the discount on the protection of personal data was decided on the altar of service of the so-called public health.

10. We ask all the above bodies to listen to the findings of the Commissioner of Administration that in the most categorical way, as mentioned above, blatantly violate a series of International Conventions and Legislation concerning medical obligations.

10.1. Conclusion of the Commissioner of Administration dated 29/07/2021 entitled: "Position regarding the measures taken to combat the coronavirus pandemic (COVID-19) and their compatibility with human rights law".

10.2. Conclusion of the Commissioner of Administration dated 10/12/2021 entitled: "Ex officio Appointment of the Commissioner of Administration and Protection of Human Rights, as an Independent Human Rights Authority, on the occasion of the International Human Rights Day".

10.3. Conclusion of the Commissioner of Administration dated 16/12/2021 entitled: "Report regarding the TEPAK protocol on the manner of conducting courses during the autumn semester of 2021".

10.4. Conclusion of the Commissioner of Administration dated 31/12/2021 entitled: "Ex officio Appointment of the Commissioner of Administration and Protection of Human Rights as an Equality and Anti-Discrimination Agency and as a the field of sports".

11. Finally, we have already reported the above in our letters to both the Chief of Police and the Attorney General of the Republic and we have already, from 28/01/2021, the beginning of criminal prosecutions against anyone responsible.

Letters to the Chief of Police with dates:

11.1. Letter dated 21/01/2021

11.2. Letter dated 20/04/2021

11.3. Letter dated 20/07/2021

Letters to the Attorney General with dates:

11.4. Letter dated 04/06/2021

11.5. Letter dated 27/10/2021

12. To this end we call on all lawyers and all doctors but also around the world to go to the office of the Attorney General of the Republic from whom we requested criminal prosecution against anyone responsible for the above violations and who to date has not responded to us.

13. We call on the people to go to the Attorney General's Office to ask for the prosecution to be finally promoted.

14. Prove to us, ladies and gentlemen, that you exist.

Savvas: Thank you Mr Neophytou.

Next we have Elpidoforos Soteriadis, Occupational Physician and Epidemiologist who will speak on the topic of the Archbishop and then move on to talk about the handling of the pandemic, on a local and global level.

Dr. Elpidoforos Soteriadis:

With our first statement today we condemn in the strongest way the behavior of the Archbishop who has put on holiday 10 priests of the Archdiocese who have not been vaccinated.

The act of the Archbishop is not only unacceptable and condemnable but also a violation of the mission of the leader of the Church of Cyprus and is in complete contradiction with the Holy Gospel.

We point out to the Archbishop in the clearest and strictest tone that it is not his job to impose on anyone whether they should undergo a medical procedure or not, or whether they should receive a vaccine.

In addition, in case he ignores it, we would like to point out to him and also to inform the people that the Archbishop's action for imposing compulsory vaccination on priests:

- First, it violates the Constitution of the Republic of Cyprus,
- Secondly, in breach of European law - Regulation (EU) 2021/953 of the European Parliament and of the Council of 14 June 2021,
- Third, it violates the 1998 Oviedo International Convention, which is a Council of Europe Convention for the Protection of Human Rights and Human Dignity with regard to the application of Biology and Medicine, and which has been ratified by law; of the Republic of Cyprus [N. 31 (III) / 2001, No. 3563, 28.12.2001],
- Fourth, violates the decision of the Holy Synod of 1 December 2020 on voluntary vaccination,
- Fifth, Violates the Sacred Rules of the Church of Cyprus,
- Sixth, Violates the Code of Medical Ethics,
- Seventh, Violates the Nuremberg Code of 1947,
- Eighth, Violates the 1964 Helsinki International Declaration;
- Ninth, Violates the Belmont Bioethics Principles of 1979 which have an international character [The Belmont Report - (1979)],
- Tenth, Violates the Published Opinion of the National Bioethics Committee of Cyprus dated 20 January 2021 for voluntary vaccination, and
- Eleventh, Violates the decisions of the Commissioner of Administration of the Republic of Cyprus.

Moreover, the Archbishop's energy has NO medical or scientific basis.

At the same time, we would like to inform the people that the Archbishop has taken ridiculous actions to implement his decision. In particular, he has put other priests who do not wish to be vaccinated on holiday, others has been rewarded for not confessing, others he has transferred to different parishes to perform the Divine Liturgy to fill the gaps of his own actions and some he has not bothered at all for reasons only known to him.

We wonder whether this is how the Archbishop perceives the equal treatment of the priests of his district? We ask: does he selectively apply his own decisions simply because it does not have enough priests to fill the functional gaps of its own irrational, illegal and anti-ecclesiastical actions?

In addition, we want to inform the people that in recent days the Archdiocese has been issuing and publishing in the media false announcements about the priests both in terms of the number of those who have not been vaccinated and especially their intention to be vaccinated.

For the above reasons, but also for many others, as members of the body of the Church, we call on the Archbishop to reflect, even now, on his tragic mistake which has caused enormous upheaval within the Church. We call on him to IMMEDIATELY revoke the holiday he has imposed on the priests in order to stop brutally provoking the legitimacy and the Christening name of the Church of Cyprus.

We also expect all the other Metropolitans and Bishops to consider their own responsibilities towards the Church and to restore the Archbishop to order by restoring unity within the Church of Cyprus.

We also call on all our compatriots, vaccinated and not, to preserve unity, solidarity and legitimacy in our country and to join forces in a joint effort to restore social cohesion in our homeland.

Finally, we call on all the Orthodox Christians of our country but also the Orthodox Christians everywhere wherever they are, vaccinated or not, to generously assist in case the Archbishop implements his threats to cut the salaries of the priests. We declare that, in case of such an action, we will guarantee the salaries of all the priests who have been put on holiday for the next 3 months.

Finally, in case the Archbishop does not revoke his decision IMMEDIATELY, he should know that he will automatically put himself out of the spirit of the Church and will be deprived of the conscience of the entire Christian crew of the Church of Cyprus and all Orthodox Christians.

In closing, we congratulate and thank the priests who have maintained this dignified and Christian attitude towards the unfamiliar attacks they receive. We are proud of their ethos and the sacrifices they make to preserve our Orthodox Faith.

Savvas Savvides - Lawyer:

A small addition in regards to the masks and court cases in relation to this as well as other measures people have challenged in court: many have asked about the presentation of the numbers of court cases being presented by the media. The truth of the matter is, the media has tried to portray that the cases have failed, but this is not true. They have hidden what's been going on. The cases are still ongoing, valid and continuing to the court, simply that the court has decided to not yet rule. That is the truth of things.

Savvas Christofi:

We thank Mr. Savvides for his intervention. To thank again all the guests who honored us either with their physical or online presence and to thank the whole world, the free Cypriot people who watched us.

At this point, I need to point out that we are very disappointed with what has been happening in recent years, the silencing and choice of one-sided advertising of the so-called "truth" of systemic media.

We are very disappointed to see that some of the major channels while invited in time with a press release but also by phone were not presented while appearing in everything and in every demonstration especially when it comes to something bad and now when they were invited to cover the different point of view which is public. This here is the different point of view but unfortunately the channels are provocatively absent.

History always shows the traitors and those who really fight for freedom whenever we call on the free Cypriot people to stand on their own two feet.

Inaction is tantamount to handing over freedom to people who have shown that they do not care about public health but carry out orders as they say. We understand fear and we are here for the great awakening and fear to be replaced by courage for freedom. If this fear is not replaced then we will simply be slaves of the New Order of Things and its slaves.

Whenever it's our debt as our ancestors fought in the past, it owes it to us because if we are afraid of what they will do to us today, imagine what they will do to us tomorrow. We are here for everyone, especially for our children.

Freedom lies in the cooperation, solidarity, unity and action of the free Cypriot people.

We are making an appointment this Monday, as the lawyer Mr. Neophytou said, at the Prosecutor's Office on Monday 7/2 at 12:30 and we call all the specialists, doctors, lawyers and teachers who have a soul and know what is right to be present. We know some people are scared but that's the right thing to do.

And it is time to end the health dictatorship and put an end to the absolute view and the uncontrolled imposition of anti-scientific and anti-social control measures, as has been done in other countries around the world. As we have seen, one country after another stops the measures because they see that there is no other way.

We are sure that all together experts, scientists and ordinary citizens who have the courage of their opinion for society and our children will put a new beginning, with a smile and positivity in our lives against the fear and terrorism that try to impose the systemic media in the last 2 years.

All this I repeat and finish, they are made for our children to be free. Let us not expect anyone else to fight for us and let us not complain.

Freedom is a sacred good and we should honor this.

I remind you about the call Monday 7/2 at 12:30 outside the Prosecutor's Office as the lawyers called us and about the financial support of the 10 priests of the Archdiocese where we will announce within days how the process will take place.

Thank you.
